

BarcodeMaker

Create barcodes directly in Adobe InDesign®

Now creating customized barcodes is simple and fast with Teacup Software's BarcodeMaker plug-in for Adobe InDesign. BarcodeMaker's versatile options allow users to make over 20 different types of barcodes by manipulating a single user-friendly palette. Anyone working with barcodes will appreciate the ability to fully customize each individual barcode by adding numbers, changing fonts and font size, adjusting color, controlling barcode height, and including or excluding checksum digits.

BarcodeMaker works in conjunction with PatternMaker, a free Teacup plug-in with powerful design capabilities. Users are given the flexibility to easily change any barcode directly in an InDesign layout. And with PatternMaker's new scripting support, you can easily automate creating your bar codes. BarcodeMaker patterns included are: AusPost, Code 2 of 5, 11, 39, 93, 128 and UCC-EAN-128, EAN-2, EAN-5, EAN-8, EAN-13, FIM, GS1 DataBar, GS1 DataBar Limited, ISBN (10 and 13), ISSN, Interleaved 2 of 5 and ITF-14, KIX, MSI, USPS OneCode, PharmaCode, Plessey, USPS Postnet, Rationalized Codabar, RoyalMail, UPC-A, and UPC-E.

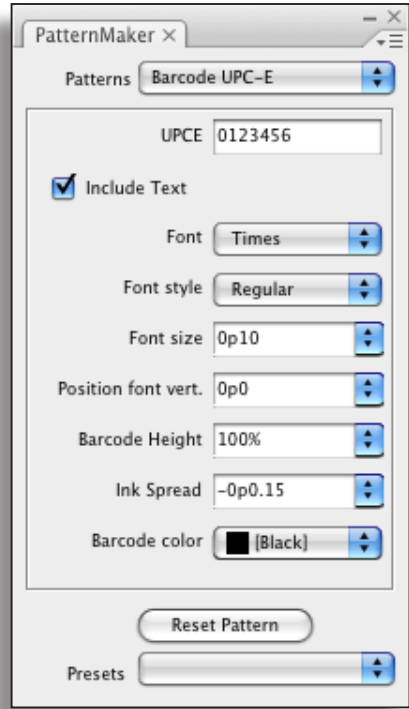

Available online at www.teacupsoftware.com!

Retail Price: \$ 169 USD

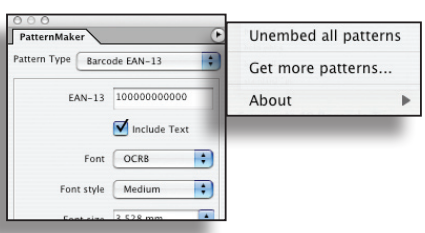

Supports 27 Barcode Types

All the major barcode types are supported, including ISBN (10 and 13 digit), EAN and UPC.

Edit Barcodes Directly within InDesign

Change the barcode number or adjust font, font size, check digit, and so forth. Each barcode has its own set of parameters you can adjust.

Easily Exportable

With the new *Unembed All Patterns* command, barcodes can be easily exported as EPS files.

Fully Automatable

PatternMaker's new scripting abilities let you automatically generate barcodes.
